

JANNAT AL NAEEM

BUILDING MATERIALS TRADING LLC

www.jannatalnaeem.com

CEO's Strategy

Our Founder Mr. Mustafa K M, started this business with confidence in his strong industry experience and commitment to succeed. 20 years later, we have built a solid reputation, relationship, and trust with our customers. This was possible because of our efficiency in delivering orders and competency in establishing an infallible supply chain network.

Our Jannat DNA

We are Jannat Al Naeem. Located in Dubai, UAE, we are a supplier, distributor, and stockiest of an array of fasteners and hardware. We have the best quality fasteners available in the market today. Since 2000, we have been known for our superior and timely service to our customers, assisting them in fulfilling demands on time. Our 20+ years of commitment, hard work, and experience have guided us to earn a notable reputation in this industry.

OUR PHILOSOPHY

At Jannat, we are incredibly proud of our ability to serve those one-of-a-kind items; we can arrange the manufacturing of special orders from detailed blue print specifications at the best price available.

Our shipping system is well-connected, thereby enabling us to cater to emergencies. Shipments are usually delivered 24 hours after receiving the order within the UAE.

We have the best quality fasteners available in the market today. Since 2000, we have been known for our superior and timely service to our customers, helping them fulfill demands on time. With 20+ years of commitment and hard work, we have earned a reputation of being the best fastener supplier.

PRODUCTS

BOLTS

Bolts are used to assemble equipment for temporary or permanent use in a range of situations and applications.

The use of bolts is also widespread in all modes of transportation, including bridges, cars, planes and trains. Additionally, bolts are used for erecting steel beams in construction projects.

SCREWS

In our daily lives, we use screws in almost every piece of equipment, be it television, microwave, furniture, or bicycle.

NUTS

Nuts complete the assembly of a bolt and are used in various situations and applications, including assembling equipment for temporary or permanent purposes. During the construction of buildings, nuts are also used to build steel beams. Furthermore, nuts are used to construct bridges, cars, planes, trains, as well as other modes of transportation.

WASHERS

Washers are often used in conjunction with nuts and bolts and are also used in conjunction with bolts and nuts to complete all assemblies, sometimes washers serve only as balancing or as a means of taking up extra space during bolting.

ANCHORS

There are many uses for anchors. They are typically used in concrete or steel to secure a piece of equipment at places like a light pole, a traffic light, a guard rail or a handrail.

STUDS & RODS

There are many applications for studs and rods, such as assembling flanges and valves. It may also be used to hang fixtures or pipe from the ceilings to specified heights, or to assemble engine parts.

CHAINS

A chain is used for a variety of purposes, such as suspending equipment into place or fastening as an extra layer of protection in the event that a bolted installation malfunctions.

PINS

Many types of pins are used in assemblies: cotter pins, for instance, for securing the wheel of a vehicle or bicycle, and dowel pins, which are used to align parts.

ONE OF A KIND

Jannat has every fastener possible, plus a lot more. Our solid relationships with manufacturers enables us to take over special orders and provide quality, cost-efficient, and prompt service.

When Do You Need a Custom Fastener?

The need for a custom fastener arises when engineering specifications require a fastener to function in an application that isn't an industry standard. It might be required if there are special length, length tolerances,

or body diameter requirements. Due to strength requirements or corrosive environments, other situations and applications may require special materials. The engineering department of the customer will provide a CAD drawing showing all aspects of the fastener for the company's production in many of these cases.

What can Custom Fasteners be made of?

The material of a special fastener can be any material used in a normal one. With our dedicated network of manufacturers, we can create your special to your exact specifications and cost efficiencies.

“

Any requirement, Jannat manages to give us the best price and the best quality, no doubt
